Launched in October 2016, the Yale Sustainability Plan 2025 is based on a vision of Yale “where sustainability is seamlessly integrated into the scholarship and operations of the university, contributing to its social, environmental, and financial excellence and positioning Yale as a local and global leader.” It is organized into NINE AMBITIONS, which are supported by TWENTY OBJECTIVES and THIRTY-EIGHT GOALS. The Plan creates entry points across disciplines and departments for broad engagement, and highlights the increasing number of opportunities to connect research and teaching with today’s real-world challenges.
This brochure provides a snapshot of the progress made towards each of the thirty-eight goals. The complete 2017 Sustainability Progress Report, which includes details of strategies and targets, can be found at sustainability.yale.edu/YSP2025.
