MISSION:
Since 2006 Yale has provided its commuters with the resources to help make the most sustainable and cost-effective transportation choices for commuting to, from, and around campus. As a critical addition to our campus sustainability efforts, Transportation Options’ initiatives reduce transportation-related pollution and reliance on fossil fuels, as well as other environmental impacts of driving and parking.

RESULTS:
From 2007 to 2010, the portion of employees and graduate students driving alone to campus dropped from 44% to 39%.

HOW DO YOU GET TO YALE?
CHANGE IN MODE OF TRANSPORTATION FROM 2007-2010
Each year, a survey is distributed to Yale Faculty, Staff, and Graduate students regarding their commute to campus. The results include an answer to the question “How do you get to Yale?” The graphs to the right and above illustrate the results from 2007 to 2010.

30% of commuters in 2010 used emission-free transportation.

OVER 60% of Yale commuters travel to campus using transportation that is greener than driving alone.

*In 2007, "Telecommute" was grouped with "Other." In subsequent years, it had its own category.
Yale’s Carpool participation has increased from 151 Carpool participants in 2007 to 441 in 2010 -- An increase of: **192%**

Yale Shuttle bus ridership has climbed steadily. Passenger numbers rose from 892,637 in 2007 to 1,400,543 in 2010, a **36%** increase.

**Y-Bikes** (shared-use bicycles) have been distributed to Yale Departments; over **6,500 miles** have been logged on bicycles since May of 2008.

**2600 MEMBERS**

According to Zipcar, “each and every Zipcar takes 15-20 personally-owned vehicles off the road.” Multiply that by the 32 Zipcars in Yale’s fleet, and it can be assumed that Yale’s campus has **640 FEWER CARS**.
